

VisionTree Optimal Care (VTOC) Oncology™ is the leader in cloud-based, patient/provider-centric data collection and health management solutions that helps you provide better patient care. VisionTree's patented line of technologies deliver increased productivity and improved workflow processes through integrated electronic documentation, communication and collection of aggregate data.

efficient

- Save time with web-based workflow featuring secure, 2-way messaging
- Multi-center portal connectivity provides access to an extensive library of patient quality of life, history and survivorship forms
- eReferral network
- Save cost with no software or hardware installation and maintenance
- Easy access for all medical team and community users

accurate

- Patient reported outcomes data collection
- Pre-Registration and Intake
- Measure quality and report to registries/agencies
- Improve capture of missing QoL data

specialized

- Specific clinical templates for surgical specialties including: Neurosurgery, Spine/Ortho Surgery and Urology.
- Build your own protocol with forms, reminders and education
- Integration with Legacy EMR
- Clinician Reported and Patient Reported Outcomes
- Data collection integrates oncology workflow with clinical trials and multi-center research
- Connectivity with data interchange standards (HL7, CCD, CCR)

VTOC HELPS DELIVER

Better Patient Care by allowing providers more time to focus on patients

Core Features

eRegister™

- > Paperless intake and registration
- > Match & Merge portal data with EHR
- > iPad and kiosk compatible
- > Patient co-pay & payments

VTOC Secure Two-Way Messaging™

- > Secure, two-way messaging between patient and coordinated care team

VTOC Quality Alerts & Reminders™

- > Templates deliver forms & content in patient's portal for paperless workflow
- > Alerts, Messages & Docs sent via email or SMS text based on triggers
- > Physician referral system, dynamic transcription & forms management

VTOC Data Connect™

- > HL7 compliant interface for bi-directional interchange with legacy EMR/PMS
- > Import / Export of patient's CCR/CCD for data exchange and Meaningful Use
- > Utilities for data mapping and exchange between clinical systems

VTOC Reporting & Query Builder™

- > Export PRO and CRO data to Excel™, de-identified for research
- > Dashboard for snapshot view of filtered, aggregated outcomes data
- > User analytics for patient task completion and activity

VTOC Mobile™

- > Secure mobile access to snapshot of patient data
- > Browser-based, no software necessary
- > Supports standards-compliant Mobile Web-browsers

VTOC Workflow Manager™

- > Roles/rules-based workflow manager by task and form status
- > Filter by date and task status
- > Communication log to track activity and follow-up next steps

VTOC is iPad® and Tablet PC compatible for Patient Portal and Medical Team login

MEDICAL TEAM PORTAL

PATIENT PORTAL

SECURITY & COMPLIANCE

- > 21 CFR Part 11 compliant for research data management
- > ARRA HITECH Act certified as modular EHR for clinical data exchange (CCD, CCR)
- > 256bit SSL at SAS-70 compliant data center

SYSTEM REQUIREMENTS

- > Internet access required > SaaS subscription model
- > All commercial browsers supported: IE7+, Firefox, Safari, Chrome
