

Connecting the dots between patients and care teams

VISIONTREE

Visiontree, a Brainlab Company, is a leader in cloud-based, patient-reported outcomes, patient engagement, population health and multi-center research/registry solutions. We aim to improve the transparency of information for patient wellness and care by delivering patient-centric data exchange, interoperability and outcomes tracking across communities.

After more than a decade in clinical use, Visiontree has documented improvements in clinical and research workflows.

- Cloud-based, patient reported outcomes application
- Integrated clinical quality & research outcomes reporting
- Time saving, paperless workflows
- Value-based care reporting with global outcomes standards across oncology domains
- Proven interoperability with all HIS / OIS clinical systems
- Embedded EHR app: Our embedded Visiontree care team app can be used with any EHR, using SMART® on FHIR® to provide a seamless, single sign-on workflow at the point of care.
